## Messages of Condolence

Sorry to hear about Ken's passing. I met Ken many moons ago working in the O&G Industry. He was mild mannered, well experienced, dependable and hard working. I can only remember once that Ken 'blew a gasket'. I got him a job on a 'pile of junk rig', he was frustrated and screamed at me, "don't you ever call me with another job again!" We were able to laugh about it and worked together on a couple of rigs after that. After our time working together, we drifted apart in recent years.

Thank you, Angela, for making the effort to track me down to inform me of Ken's passing.

Rest in peace.
