Messages of Condolence

My sincere condolences to the remaining family. I will remember Joan for her "sparkling" wit, her very interesting and unique approach to life and for the hours and hours and hours spent in debate/discussion regarding everything and anything---after which there was never any hard feelings. She was so very good at agreeing to disagree. She was a sensitive, resilient and very intelligent woman. We are all the better for having had her in our life and she will be missed.

I was saddened to hear of Joans passing. I spent many nights on the road with Joanie on our way to pick up distressed babies all over Saskatchewan. We had a few good laughs then but it was all professional when dealing with her precious patients. She had very deep feelings about those little ones. I will miss her.
